

Notice to Customers

From time to time, we receive questions about our wash process from customers and from manufacturers (of trucks, trailers, other vehicles, and vehicle accessories such as wheels, mirrors, etc.) wanting to compare our wash process to the Cleaning Instructions or Warranty Requirements provided by equipment manufacturers. For everyone's convenience, we post information about our wash process in the table below. For more information call 1-833-252-3575.

Our Products*	Purpose and Use	Average pH	Application Pressure
Pre-Soap	A concentrated soap sprayed onto almost all surfaces before we wash.	11.52	Low
Wash Water	Warm, soapy water we wash with.	9.42	High
Brightener	Highly diluted acid used on most painted and chrome surfaces and on aluminum at driver request. Less than 1% acid / 99% water.	3.05	Low
citrushine®	Highly diluted blend of citric and other acids applied only to aluminum when purchased by driver. <i>Doesn't clean perfectly, cleans better than soap alone, leaves the shine, and will not turn aluminum white.</i>	1.48	Low
Rain-X® Complete**	All-surface protectant applied when purchased by driver.	5.80	Low
WeatherShield®**	Paint protectant applied when purchased by driver.	7.86	Low
Salt-Away®** <small>At limited locations</small>	Undercarriage treatment applied when purchased by driver. Inhibits rust and corrosion from road salts.	7.90	High
Deodorizer** <small>At limited locations</small>	SaniDate® 5.0. Used only in washouts when purchased by driver. We use SaniDate as a deodorizer only, not as a sanitizer.	4.89	Low
Foamer	Diluted Dawn® dishwashing soap (or similar product) in bucket. Brushes are dipped in it.	8.10	In Bucket

*Products are the same at almost all locations. A few locations use variations of or alternatives to these products due to local environmental regulations. The Average pH shown is the average of all of our locations for each product listed. We believe pH may vary at individual locations due to pH differences that exist in each location's incoming water supply.

**Stated benefits for Rain-X, Weathershield, Salt-Away, and SaniDate are those of the respective manufacturer. Blue Beacon has not independently verified their accuracy.
